Itention simpson is a solid statter who is enecuve mostly in coverage, especially in 20ne. He s reliable in that he makes plays out in space without missing tackles or causing any other critical errors. While he struggles working against blockers at the line of scrimmage, he knows his limitations and adjusts to make the most out of every play. Simpson's struggles at the line of scrimmage are caused by a lack of dominant strength and quickness. Simpson, though, has the competitiveness and toughness to get his head in the pile and consistently work until the whistle sounds. In addition to playing defense, Simpson is an active participant on special teams, working with the kick return, field goal block, and ounting teams.
